

H.Lee Swanson, Ph.D. is currently research professor in Educational Psychology at the University of New Mexico. He was previously Distinguished Professor and Peloy Endowed Chair, Educational Psychology, at the University of California-Riverside. He did his Post-doctoral work at UCLA and obtained his Ph.D. from the University of New Mexico. He has previously served as department chair of Educational Psychology, School Psychology and Special Education programs. He has also been the director of two Educational/Psychological clinics at two Universities. He has been the previous editor of the *Journal of Learning Disabilities* and the *Learning Disability Quarterly*.

His primary research focuses on cognitive development in children at risk for learning disabilities. His major work has focused on identifying risk factors related to memory, math, reading and intellectual development. His current research also includes studying cross-language transfer among ELL children as well as developing evidence based math intervention programs.
